

Edgewater Elementary School Sample Earthquake Annex

Edgewater Elementary School is located in an area that, according to the U.S. Geological Survey (USGS), has a high probability of experiencing an earthquake. In many parts of Oregon, earthquakes are a serious threat and can strike without warning. We must be prepared for an earthquake in the state, as well as one occurring offshore in the Cascadia subduction zone. If this were to occur, it could severely damage not only the school, but a lot of Oregon’s infrastructure. We expect that roads could be impassible, bridges severely damaged, and utilities destroyed, and it may be weeks or months before this infrastructure is repaired. Mitigating potential hazards before an earthquake strikes, being prepared to take protective measures when the ground shakes, and preparing to meet the immediate and short-term needs of students and staff members following an earthquake are essential elements in our *Earthquake Annex*.

BEFORE an Earthquake Occurs			
Goals: Prevent injuries, loss of life, and property damage; be equipped to meet basic needs			
Objectives: Train whole school community in earthquake response; conduct non-structural and structural mitigation; and inspect and replenish emergency supplies			
WHO IS RESPONSIBLE	COURSE OF ACTION	DUE DATE	FOLLOW-UP REQUIRED

Have staff sign off on training requirements fulfilled.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Work with media in advance so that they are prepared to post proper information and sources for parents/guardians (hereafter referred to as “families”) to receive updates. <input type="checkbox"/> Review <i>Earthquake Annex</i> with district and community partners. 	in fall	District Safety Office if needed.
--	--	---------	-----------------------------------

DURING an Earthquake

Goals: Protect students and staff from injury;
meet the basic needs of the whole school community

Objectives: Take immediate protective measures during the shaking;
safely evacuate after the shaking stops; and
provide for immediate and short-term medical, physical, and emotional needs

WHO IS RESPONSIBLE	COURSES OF ACTION
Whole School Community	<ul style="list-style-type: none"> <input type="checkbox"/> All students, staff members, and visitors should immediately Drop, Cover, and Hold On. This includes teachers. <p>DROP down onto your hands and knees (before the earthquake knocks you down). This position protects you from falling but allows you to still move if necessary.</p> <p>COVER your head and neck with one arm and hand. If a sturdy table or desk is nearby, crawl underneath it for shelter. If no shelter is nearby, crawl next to an interior wall (away from windows). Stay on your knees; bend over to protect vital organs.</p> <p>HOLD ON until the shaking stops. If you are under shelter, hold on to it with one hand; be ready to move with your shelter if it shifts. If you are not</p>

under shelter, hold on to your head and neck with both arms and hands.

- Implement individual earthquake response plans (which were created using the “*Special Accommodations for Drills & Emergencies*” form) for those with disabilities or access and functional needs as best as you are able given the setting and situation you find yourself in when the shaking starts.
- During the shaking, try to give verbal instructions and encouragement to the students in your care, reminding them of protective measures to take and working to calm them.
- If the fire alarm sounds while the ground is still shaking, wait until the shaking stops before evacuating.
- When the shaking stops, instruct students to hold their position temporarily while you assess the situation. There may be broken glass, debris, loose ceiling tiles, blocked or jammed exit doors, or other hazards. There may be injuries or students who are trapped. Quickly tend to immediate life safety needs, including extinguishing any small fires.
- Work to safely evacuate your students. Evacuate whether or not the fire alarm sounds. Instruct students to be watchful for hazards, to be prepared to take alternative routes, and to help each other since there may be injuries. See *Evacuation Annex*.
- If students are trapped, make a plan with your Buddy Room Teacher for one teacher to exit with both classes while the other stays with the trapped student(s). Be sure to write the names and room numbers of all staying behind for the Buddy Room Teacher to report at the Assembly Area once evacuated. See *Accounting for All Persons Annex*.
- If it appears safe and there is enough time, evacuate with your yellow emergency supplies bucket and with student coats/backpacks, if students can access them quickly.
- If an aftershock occurs while you are exiting, Drop, Cover, and Hold On until the shaking stops.
- If you are outside during an earthquake, stay outside. Try to move away from buildings, utility poles, trees, and other hazards into a clear, open

Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center

Sample Earthquake Annex

	<p>space. Drop, Cover, and Hold On until the shaking stops.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Once at the Assembly Area, follow protocols to account for all students, staff members, and visitors in your care. See <i>Accounting for All Persons Annex</i>. <input type="checkbox"/> Continue to supervise students, reassuring them and preparing them for next steps such as family reunification, sheltering, etc.
WHO IS RESPONSIBLE	COURSES OF ACTION
<p>Incident Command/Unified Command [Administrator/emergency responders²] & General Staff (Operations, Planning, Logistics, and Finance/Administration Chiefs) as needed</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Principal or designee establishes Incident Command Post and assigns incident management personnel, as needed, according to Incident Command System (ICS) structure. <input type="checkbox"/> Implement protocol to account for all students, staff members, and visitors. [See <i>Accounting for All Persons Annex</i>.] <input type="checkbox"/> Implement light search-and-rescue protocols, depending on outcome of accounting for all students, staff members, and visitors, using Teen CERT and/or trained staff. [See <i>Light Search & Rescue Annex</i>.] <input type="checkbox"/> Implement emergency medical protocols to meet immediate medical needs. Activate Teen CERT and/or trained staff to triage and set up/operate a medical treatment area. [See <i>Public Health, Medical, and Mental Health Annex</i>.] <input type="checkbox"/> Be prepared for a possible tsunami. [See <i>Tsunami Annex</i>.] <input type="checkbox"/> Implement family reunification protocols. Prepare students and staff for delayed reunifications since damage to roads and bridges may make reunification a several day event. [See <i>Family Reunification Annex</i>.] <input type="checkbox"/> Communicate your school status to the district office if/when able. If normal communication methods are not available, consider options such as amateur (ham) radios, bus radios, and school two-way radios. [See <i>Communications and Warning Annex</i>.] <input type="checkbox"/> Implement emergency communications protocols for communicating with families, as you are able and as options become available. Coordinate with community partners such as the county Emergency Operations Center and

² Square brackets indicate who will likely fill the role under the Incident Command System (ICS).

Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center

Sample Earthquake Annex

	<p>amateur radio partners if normal communication methods are not available. [See <i>Communications and Warning Annex</i>.]</p> <ul style="list-style-type: none"> <input type="checkbox"/> Set up an Information Center area outside school as a community reception point. This area will provide information dissemination and direct people to appropriate areas (volunteer coordination, family reunification information, etc.). [See <i>Communications and Warning Annex</i>.] <input type="checkbox"/> Implement overnight sheltering protocols for delayed reunification situations, if needed. Determine which staff members can stay and which need to leave. [See <i>Overnight Sheltering Annex</i>.] <input type="checkbox"/> Coordinate with first responders and the district incident command team as they become available. <input type="checkbox"/> Non-Shelter School: After initial family reunifications are complete for families who are able to get there, implement your off-campus evacuation plan, transporting the remaining students to the nearest “shelter school.” See <i>Evacuation Annex</i>. Hang a sign on your school main entrance door indicating where students have been relocated to so families can report there for reunification. <input type="checkbox"/> Shelter School: Deploy emergency cache resources to prepare to meet immediate and short-term basic needs. Enlist the help of older students and adult volunteers. [See <i>Emergency Cache Appendix</i>.] <input type="checkbox"/> Consult the <i>Incident Commander Checklist</i>, which is found near the bottom of the Emergency Plan flip chart for additional action steps to consider.
WHO IS RESPONSIBLE	COURSES OF ACTION
<p>All Staff & Coaches going on field trips or athletic events</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Implement earthquake procedures (Drop, Cover, and Hold On and evacuation, as described above) and the specific earthquake/tsunami response procedures applicable to your location. <input type="checkbox"/> Follow Activity Trip Emergency procedures (see <i>Activity Trip Annex</i>): <ul style="list-style-type: none"> • Tend to immediate health and safety needs; • Account for and supervise all students; • Communicate your status and needs with the school/district office as you are able; and • Follow procedures for the appropriate release/return of students as able. <input type="checkbox"/> Coordinate with host location for the possibility of short-term sheltering

Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center

Sample Earthquake Annex

	and care of your group.
WHO IS RESPONSIBLE	COURSES OF ACTION
All School Bus Drivers & Type 20 Activity Bus Drivers	<p>If you feel the ground shake:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Decrease your speed and pull to the side of the road as quickly as possible. If feasible, stop out of the tsunami zone and try to avoid stopping on or under overpasses or bridges, near signs, power lines, trees, buildings, or any other hazard that might fall onto your bus. <input type="checkbox"/> Secure the bus: shut off the motor, set the brake, and remove the keys. Activate four-way flashers. <input type="checkbox"/> The students and you should keep your seat belts on, if seatbelts are available. Students should take a protective position in their seats, covering their heads and turning away from windows. <input type="checkbox"/> If you are in a tsunami zone, after the shaking stops immediately move to the nearest high ground by bus, if possible, or by foot if the road is not passable. You may have only minutes to get to high ground, so take immediate action. <input type="checkbox"/> If you are not in a tsunami zone, stay put. Keep students on the bus if it is safe. Conserve fuel as you may need this to provide warmth and for radio contact. <input type="checkbox"/> Stay on high ground. Powerful tsunami waves and surges can come and go for up to 24 hours. You may have to shelter there for an extended period of time. Reassure students and prepare them for this possibility. Follow protocols in the <i>Overnight Sheltering Annex</i>, if needed. <input type="checkbox"/> Communications are often challenging during large earthquakes. Attempt to contact Bus Dispatch. If you are not able to reach Bus Dispatch, refer to the emergency phone list in your Bus Packet and try those phone numbers to relay information. Remember, sending and receiving messages via text rather than a phone call may be easier in an emergency. [See <i>Communications and Warning Annex</i>.] <input type="checkbox"/> Prepare students for aftershocks. Drop, Cover, and Hold On during an aftershock, if you are outside. Stay away from poles, trees, power lines, etc.
